

Light Kits

8" COMPACT LIGHT KIT

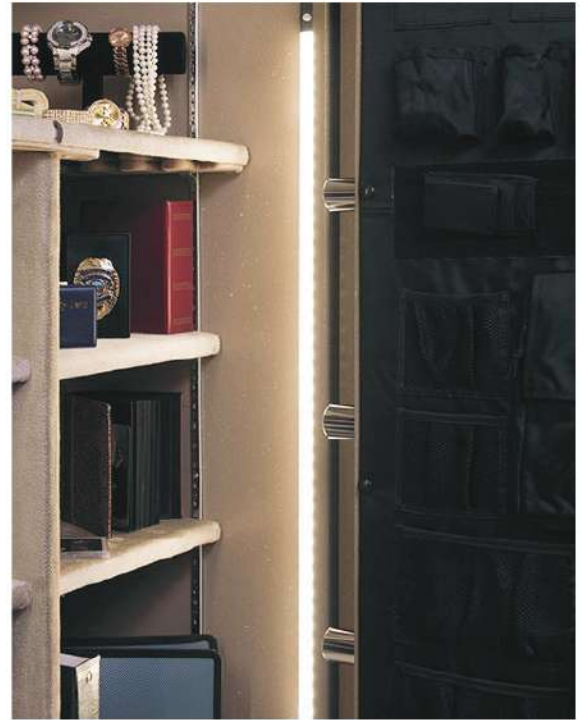

Provides greater visibility inside smaller American Security® safes. Features (2) 8" light strips with high-intensity white LED lights and a motion sensor that automatically turns the lights on when motion is detected. The lights turn off 30 seconds after motion has stopped. This light kit can be installed on any American Security safe. Includes battery pack. Retrofit Only.

36" LED LIGHT KIT

Has (2) 36" light strips with high-intensity white LED lights and a motion sensor that automatically turns the lights on when motion is detected. The lights turn off 30 seconds after motion has stopped. This light kit can be installed on any American Security safe and is also available as a retrofit kit.
